Volleyball sign-up · Changelog

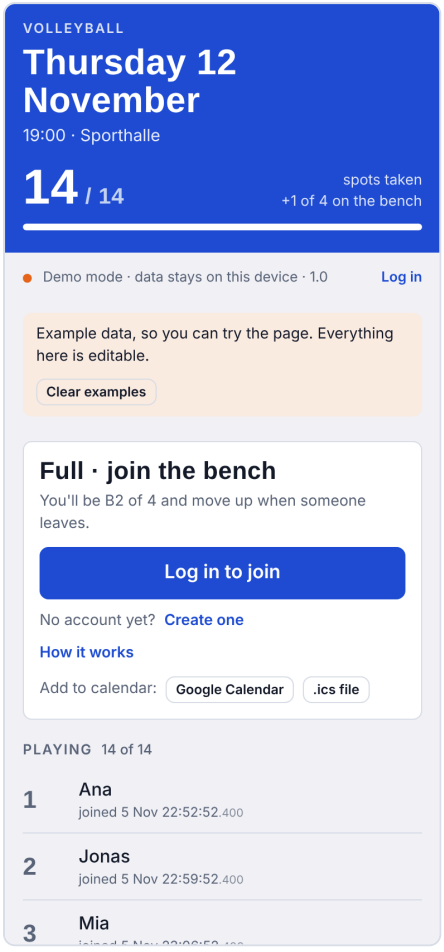

Version 1.0 · everything from the first version (30 October 2026) to the release on 6 November 2026

Live page: **koraykayir.github.io/volleyball/**

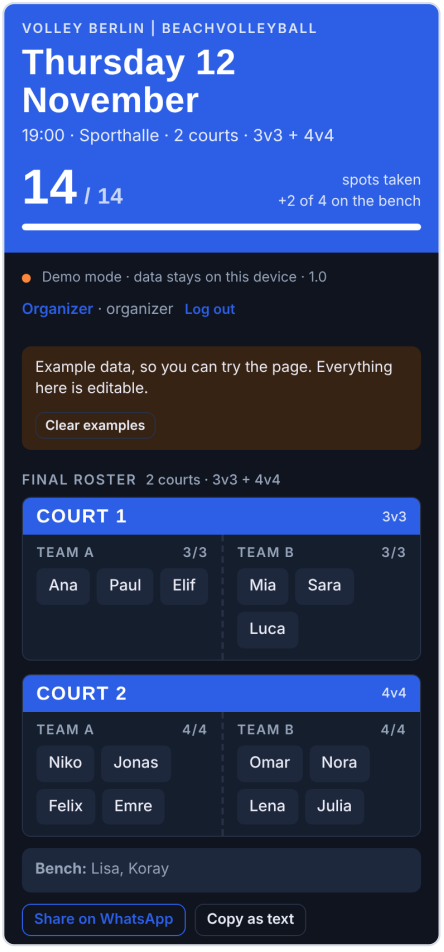

Demo (example data, no login needed for organizer tools): **…/volleyball/demo/** Organizer: **Gürkan**

What it is

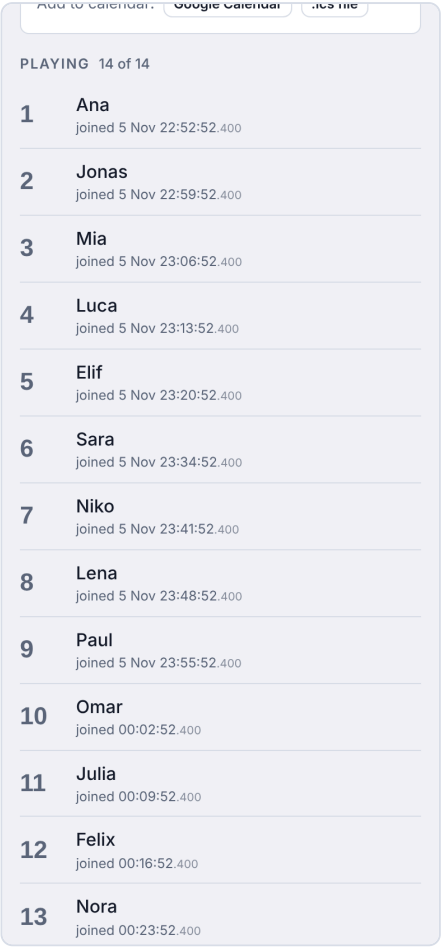

A single web page for the weekly volleyball group. People create an account once and join each session with one tap. The list is strictly first come, first served: the first N play, everyone after that waits on the bench and moves up automatically when someone leaves. The organizer runs sessions, tracks payments, generates balanced teams and shares the roster, all from the same page. Data lives in Firebase, the page is hosted on GitHub Pages, and every change reaches everyone's screen live.

The page as a visitor sees it: scoreboard band, join card, the live list.

Dark mode follows the phone setting.

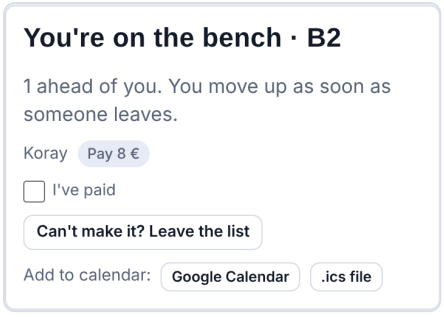

As a player: name, position and registration time (with seconds, in server time).

Version 1.0 6 NOV 2026

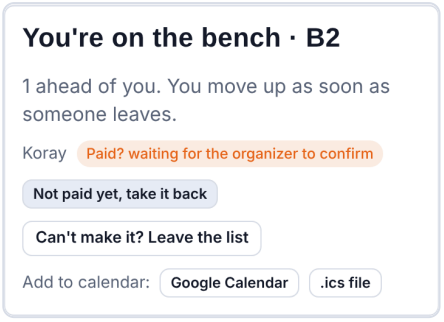

build v16 · the release the group starts using

- **"I've paid" box.** Players tick it after paying; the organizer sees *says paid* next to the name and confirms with one tap, or "Confirm all" in Payments. No payment links or bank details on the page.
- **Your record** on the account page: played, bench, no-shows, times left, and how many of those were late (inside the last 3 hours before the start).

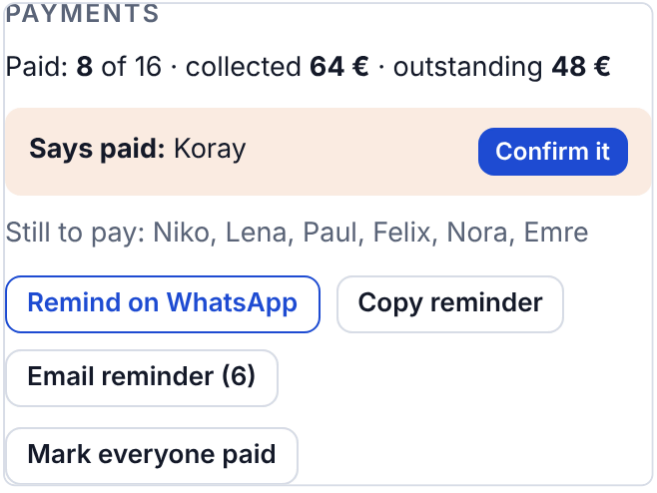

- **Next week in one tap.** After "Mark as played", "Start next week's session" copies all settings 7 days ahead; the announcement is ready right after.
- **Announcement in the group's format** (📅 📍 🏐 👥 💶, waitlist sentence, sign-up link, opening time) with new session fields "Indoor / outdoor" and "Games" (e.g. 3v3 / 4v4). A QR code of the page with "Save QR as image", "Copy link", and "Copy list" (numbered list as text).
- **Undo** for removals (10 seconds), and a "Late leave" column in the attendance stats for organizers.
- **Opening-time presets:** Monday before / 3 days before / 1 week before at 20:00, or right away.
- **Delete my account** on the account page (password or Google confirmation; past sessions keep the name).
- **"How it works"** on the login page and the join card.
- **Roster rule:** players are grouped by who played together first; the stronger group takes the smaller court, and overflow spills to the next court. Verified against the brute-force optimum (25/25 random histories).

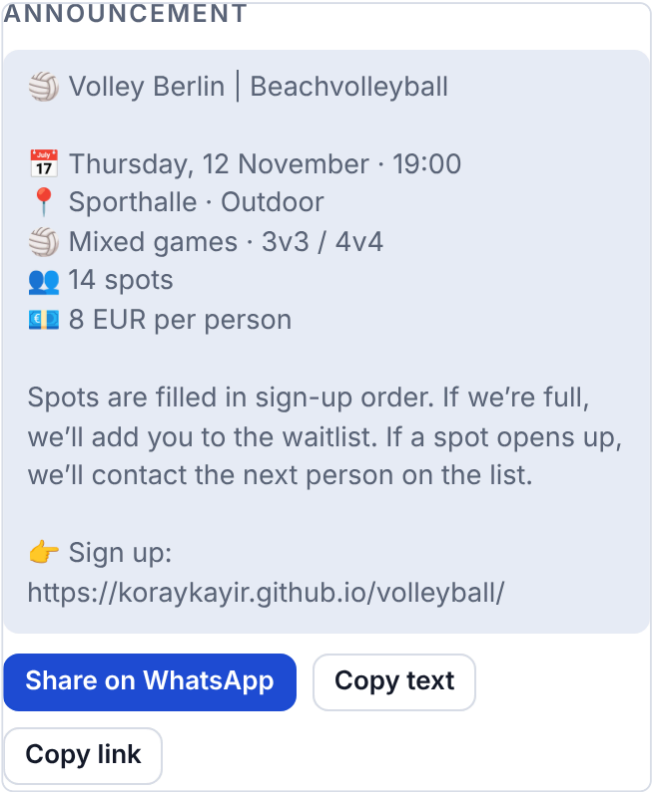

Own card with the "I've paid" box.

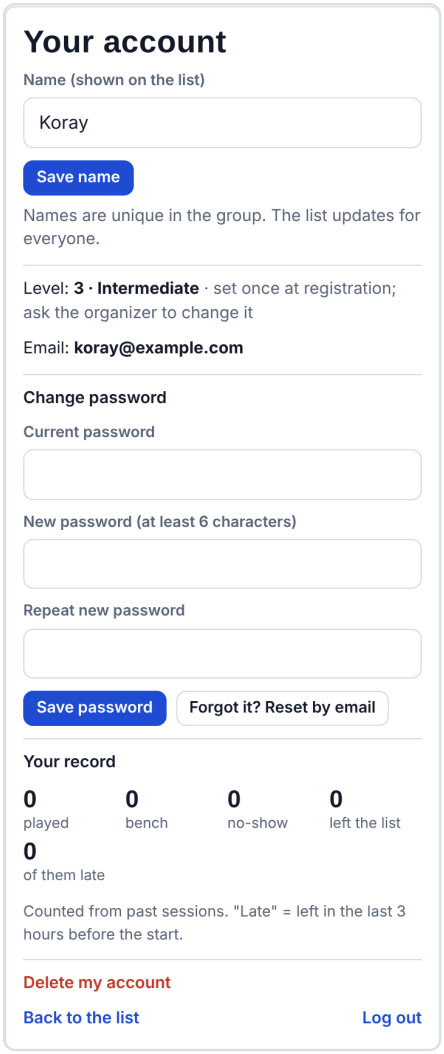

After ticking: waiting for the organizer to confirm.

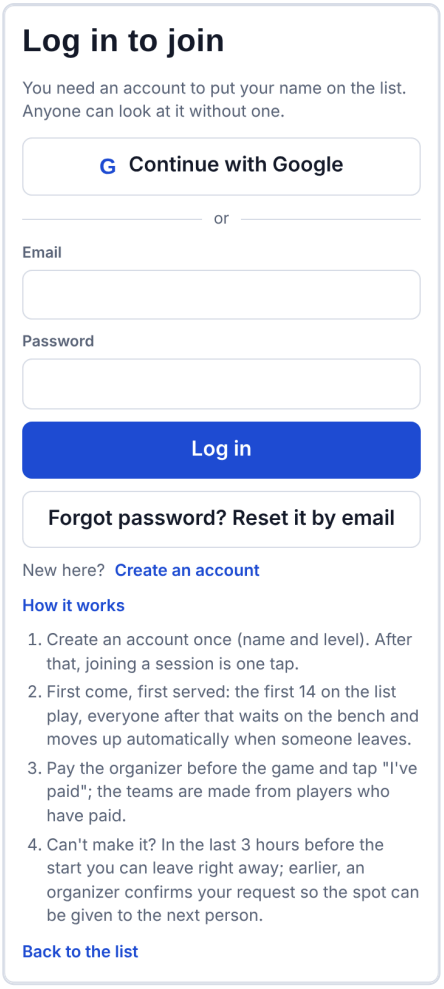

Organizer: "Says paid" with one-tap confirmation.

The announcement in the group format with the sign-up link; a QR code of the page sits below it (not shown here).

Account page: name, password, your record, delete account.

Login page with "How it works".

v15 · Feedback pass 6 Nov 2026

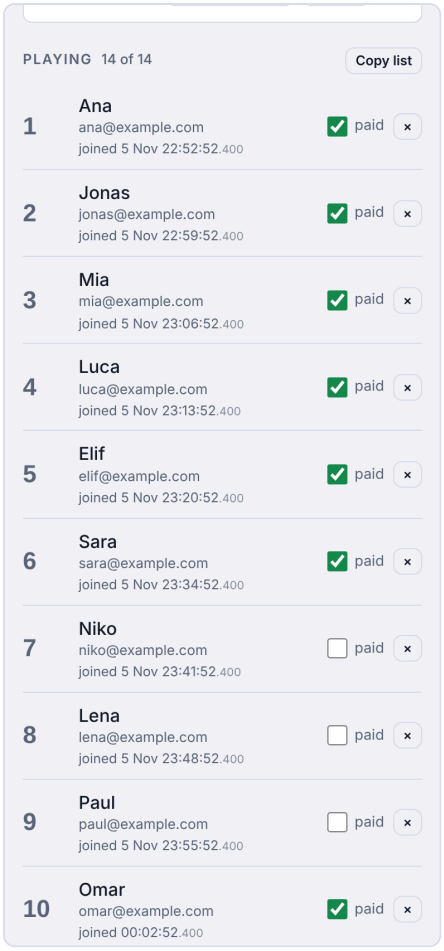

- Toasts (with a short buzz on phones) for everything that happens to you: joined, moved up from the bench, marked paid, let go / kept / removed by an organizer, list full or a place free again, sign-ups open (the Join button pulses).
- The browser tab shows your state: "#5", "B2", "Open", "Bench open", "Full", "Opens 18:00", "Played".
- Every writing button shows "Saving…" and ignores a second tap until the write is through.
- Confirmations for all organizer actions by name; organizers get a toast when someone asks to leave.
- Errors stay as a dismissible red note until the next successful action; offline banner with Refresh and "Back online" toast; "Live · last change 2 min ago" in the status line.
- New rows fade in, rows that moved flash briefly, and a "Recent: Ana joined · just now" line sits under the bench.
- Session form: "Unsaved changes" pill, Update disabled until something changes, odd roster counts flagged and blocked.

v14 · Privacy of payment details 6 Nov 2026

- Non-organizers see only name, position and registration time on the list (plus "you" on their own row). Paid markers, emails and all controls are organizer-only; previous sessions hide payment info from non-

organizers too.

- Server rules: only organizers edit or remove others and mark payments (verified); a self sign-up must use the account's registered name.

Organizer view of the list: emails, paid boxes, remove.

v13 · Roster count, bench count, courts chosen at roster time 6 Nov 2026

- The session form asks for a **roster count** (how many play) and a **bench count** (how many may wait) instead of courts. The list is full once roster + bench are taken.
- **Generate roster** starts with a courts step: how many 2v2 / 3v3 / 4v4 / 5v5 courts. The total has to match the roster count exactly, otherwise "Generate teams" stays disabled with a clear message. Courts are stored with the roster and shown everywhere the roster is.
- Court 1 is the smallest court; "Change courts" in the editor goes back to the courts step.

SESSION

Current: Thu 12 Nov 19:00 · 16 signed up (8 paid)

Date

11/12/2026

Time

07:00 PM

Place

Sporthalle

Indoor / outdoor

–

Games (for the announcement)

e.g. 3v3 / 4v4

Roster (players)

14

Bench (max.)

4

Price per person

8 €

Sign-ups open at (optional)

mm/dd/yyyy, --:-- --

Duration (minutes)

120

Open: Monday before, 20:00

3 days before, 20:00

Session form: roster and bench counts, opening presets, indoor/outdoor, games.

FINAL ROSTER

How many courts of each type? The roster has **14** spots. People who often played together are grouped first; the stronger groups get the smaller courts.

2v2 (4 players)

0

3v3 (6 players)

1

4v4 (8 players)

1

5v5 (10 players)

0

2 courts · 3v3 + 4v4: room for exactly 14 players.

Generate teams | Cancel

Courts step: totals must match the roster.

FINAL ROSTER

2 courts · 3v3 + 4v4. People who often played together are grouped first (from 1 past session with saved teams), and the stronger groups take the smaller courts; teams are split so their average levels are as close as possible. Tap a player, then tap another to swap them, or tap "Move here" on a team. Dashed chips haven't paid.

COURT 1 3v3

TEAM A 3/3 · Ø 3.7	TEAM B 3/3 · Ø 4.0
Ana, Paul	Mia, Sara
Elif, + add	Luca, + add

COURT 2 4v4

TEAM A 4/4 · Ø 2.5	TEAM B 4/4 · Ø 2.8
Niko, Jonas	Omar, Nora
Felix, Emre	Lena, Julia
+ add	+ add

NOT IN THE ROSTER 2

HTML file | Email to players (16)

Preview and export: WhatsApp, text, PDF, HTML, email.

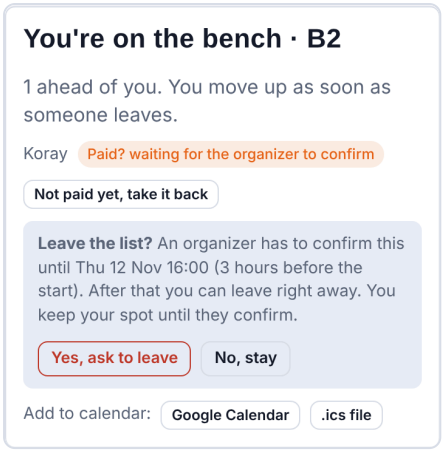

The saved roster as everyone sees it.

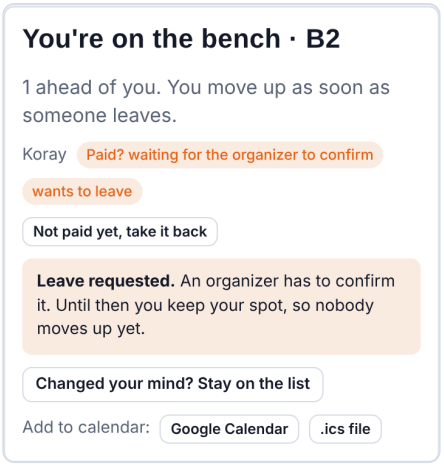

v12 · Leaving with confirmation, organizer approval, activity log

6 Nov 2026

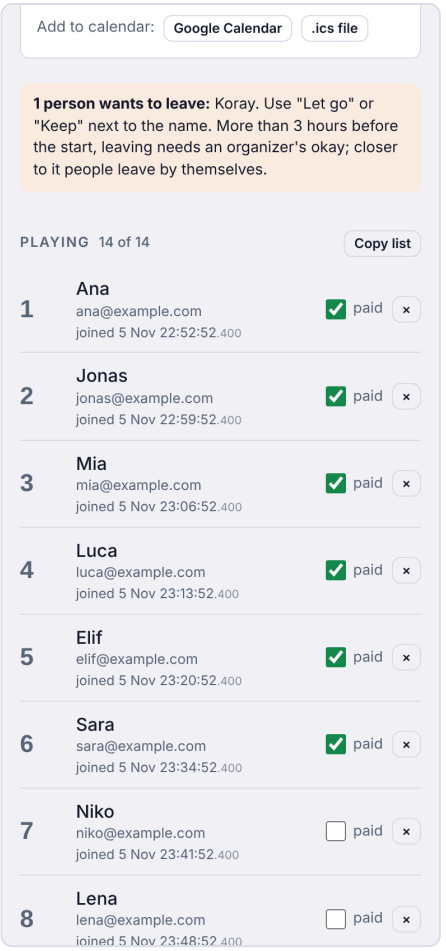

- "Can't make it?" asks for confirmation. More than 3 hours before the start it becomes a request that an organizer confirms ("Let go" / "Keep on the list"); the person keeps the spot until then and can take the request back. In the last 3 hours, and after the start, leaving is immediate.
- The session start is stored on the server and the rules enforce the same 3-hour window.
- When someone leaves, the first person on the bench takes a playing spot and the whole list re-numbers in joining order; the log and the organizer's toast say who moved up.
- **Activity log** for organizers: every join, rejoin, leave, leave request/decision, registration, rename and every organizer change (add, remove, paid, no-show, session edits with a diff, played, teams saved, levels), written in the same write as the change itself. Filters by session, type and name; CSV download.

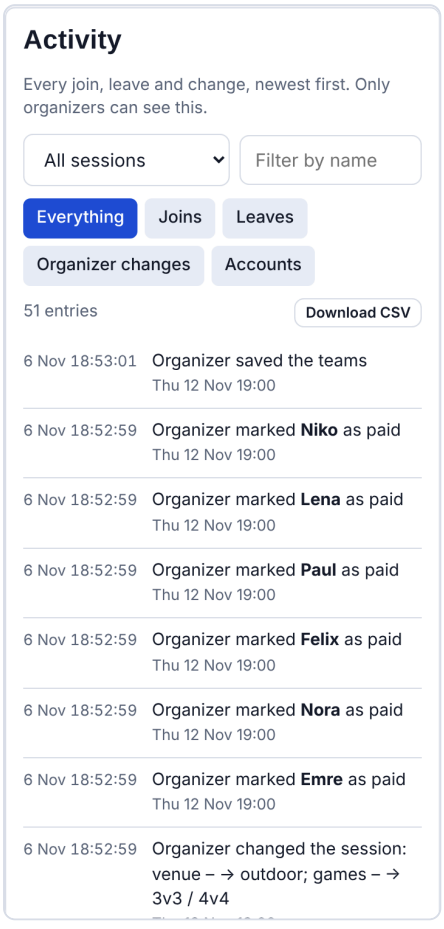

Leave confirmation, with the 3-hour rule explained.

While a request waits for an organizer.

Organizer: notice and Let go / Keep next to the name.

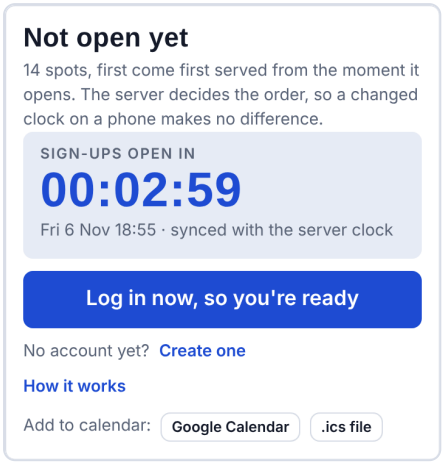

Activity log with filters.

v11 · Account page, password reset, live list 6 Nov 2026

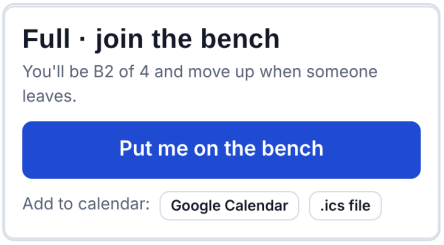

- Tap your name in the status bar: change the name shown on the list (unique in the group; the list follows at once) and change the password.
- "Forgot password? Reset it by email" on the login page and on the account page. Google accounts see a note instead of password fields.
- The list re-renders on every server change even while someone is typing; focus, caret and text are preserved. Demo mode syncs open tabs.

v9 – v10 · Server-controlled opening time and countdown 6 Nov 2026

- The opening time is enforced by the server (a changed phone clock makes no difference). The page measures the difference between the phone clock and the server and shows a countdown in server time; at zero it switches to the Join button by itself (with retries around the opening second).
- Demo shortcut: `/demo/#countdown` makes the demo session open 3 minutes from now; `#soon` moves the start to 2 hours from now.

Countdown before sign-ups open.

The join card once it is open.

v8 · One entry per account, unique names 6 Nov 2026

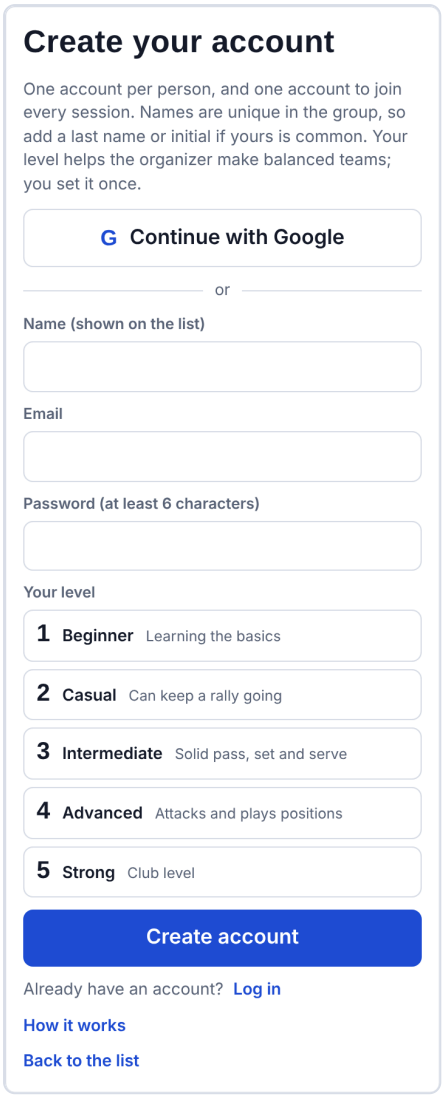

- Each account can be on a session's list once; names are unique across the group (a claim registry on the server), so two people can never appear under the same name. Joining is blocked when the organizer already added someone with that name.

v4 – v7 · Server-side order and registration time 6 Nov 2026

- The order of the list is decided by the server clock: every sign-up is stamped on arrival (rules reject any other time), ties are resolved by nanoseconds, and entries still on their way show as "saving…" after all confirmed ones.
- Registration time shown with seconds and milliseconds, in server time.
- Version tag in the status line ("Live · v7"), a self-update that reloads once when a new version is served, and a demo copy at `/demo/` with example data stored on the device.

v3 · Hosting, database, accounts, smarter teams 1 – 5 Nov 2026

- Hosted on **GitHub Pages**; data moved from a Google Sheet (via Apps Script) to **Firebase** (Firestore + Authentication), with security rules in the repository.
- **Accounts:** register with Google or email and password; the level (1–5) is asked once at registration; afterwards only an organizer changes it. Organizers are recognised through an admin list in Firebase.
- Joining requires a login; the list can be viewed by anyone. The guest (+1) option was removed.
- **Roster algorithm:** people who played together before share a court; then each court is split into two teams with the closest average level, honouring keep-together and keep-apart pairs.

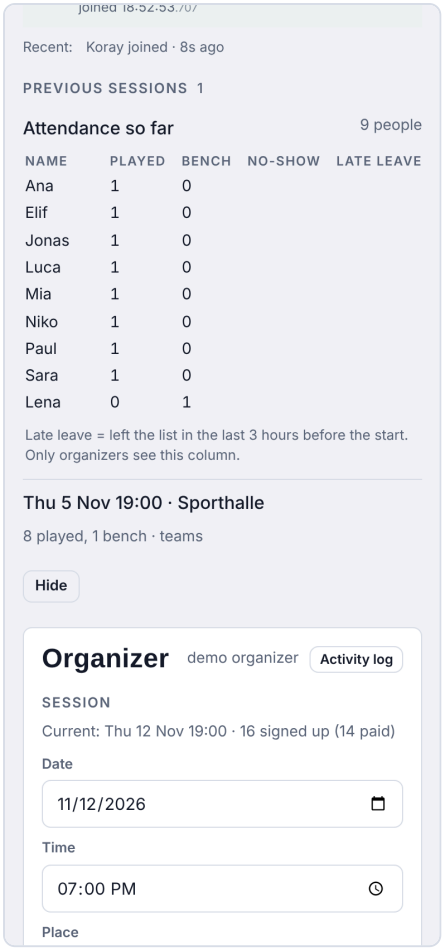

Registration: name, email, password, level (asked once).

v2 · Previous sessions, mixed courts, stored teams 30 – 31 Oct 2026

- Organizer-only "Mark as played" with no-shows; the history keeps every session.
- Previous sessions section with attendance per person (played / bench / no-show), teams stored with each session and editable later.
- Any mix of 3v3 and 4v4 courts; capacity follows the courts.
- Improvements round: announcement text with WhatsApp share, payment reminders (WhatsApp, email), "Mark everyone paid", calendar links (Google Calendar, .ics), "Same as last time, +7 days", PWA meta tags,

dark mode, organizer settings (group name, organizer name, page link).

Previous sessions with attendance stats.

v1 · First version 30 Oct 2026

- A single HTML file built from the group's requirements: first-come-first-served sign-up list with a capacity, bench overflow that moves up automatically, organizer payment tracking.
- Roster generation from paid players with balanced teams by level, manual editing by tapping players, visual preview, and export as WhatsApp text, PDF and HTML file.

Under the hood for the organizer

Security rules (Firebase)

- Anyone can read the list; only logged-in players with a profile can join, and only their own entry: join, ask to leave, take it back, leave in the 3-hour window, rejoin (back of the queue), rename, "I've paid" note. The server stamps every time itself.
- Only organizers (the `admins` list) edit or remove others, mark payments and no-shows, change sessions and levels, or read emails, the activity log and the attendance details.
- Names are unique through a create-only registry; players may delete their own account.

Testing

Every version was checked with automated browser tests against an in-memory stand-in for Firebase (13 suites, about 350 checks: sign-up order, unique names, opening time and clock skew, accounts, leave flow,

activity log, roster counts and courts, privacy, feedback, the 1.0 features) plus a roster evaluation that compares the generator with the brute-force optimum.

Versions at a glance

VERSION	DATE	MAIN CHANGE
1.0 (v16)	6 Nov	I've paid, record, next week, announcement + QR, undo, presets, delete account, how it works, groups-first roster
v15	6 Nov	Feedback: notices, busy buttons, errors, offline, highlights
v14	6 Nov	Payment details and emails organizer-only
v13	6 Nov	Roster/bench counts, courts at roster time (2v2–5v5)
v12	6 Nov	Leave confirmation, organizer approval, activity log
v11	6 Nov	Account page, password reset, live list
v9–v10	6 Nov	Server-controlled opening time, countdown
v8	6 Nov	One entry per account, unique names
v4–v7	6 Nov	Server-side order, registration time, self-update
v3	1–5 Nov	GitHub Pages, Firebase, accounts, roster algorithm
v2	30–31 Oct	History, mixed courts, stored teams, improvements
v1	30 Oct	First version
